MODULE ONE WAYFINDER

# **SPECIFICATIONS**

Power	1 Watt
Ingress Protection Rating	IP68
Cable	H05RN-F 1m Included
Material	<ul><li>Black/White/Bronze</li><li>Powdercoated</li><li>Natural Copper</li><li>316 Stainless Steel</li></ul>
Removable Light Engine	Screw Mounted 1W 3vf Cree XPG-3 Chip
Colour Temperature	Warm White - 2700K and 3000K Neutral White - 4000k
CRI	90+ CRI
Efficacy	80lm/w - Delivered from Luminaire with unobstructed beam
Input	350mA 3vdc Constant current (Remote) 12V AC (Integral) 24V DC (Integral)
Warranty	Electronics Warranty 5 Years
Body Warranty	5 years Aluminium and 10 years Copper and Stainless Steel
LED Shield	LED Bypass Shunt Reverse polarity protection
LED Life Expectancy	50,000 Hours
B Number	94.05

# REMOTE DRIVER WIRED IN SERIES

output.

Often referred to as series wiring the current in a series circuit follows one path from start-to-finish with the positive of the second LED connected to the negative of the first. Series wiring allows a single driver to be mounted remotely, powering a number of series fittings. Often the most simplest of wiring schemes as each fitting is connected to the next in a daisy chain. It removes the need for a smaller 12 volt driver in each fitting.

# M1 WAYFINDER

The M1 luminaire range is powered by a 1 watt LuxR light engine that offers a wide choice of LÉD colours. The luminaire was developed to meet the challenge of delivering high quality practical accent lighting with maximum energy efficiency and a long, maintenance-free life.

All LuxR luminaires offer a replaceable LED system using Cree LED chips for maximum performance and long life. Precise LED binning by Cree ensure the same colour temperature across all our luminaires which allows LuxR products to be situated close to one another without the fear of colour variance in the colours.

This luminaire is extremely tough, durable and waterproof, making it ideal for installation in public spaces, large-scale projects and residential areas.

# **RECOMMENDATIONS**

If you are unable to spike this luminaire into gardens or along side paths you can specify this product with a surface mount flange. This allows the user to mount the luminaire where it is not possible to spike it in, such as concrete.

# INTEGRAL DRIVER + TRANSFORMER

In a parallel circuit all the positive connections are tied together and back to the positive output of the LED driver and all the negative connections are tied together and back to the negative output of the driver. The integral driver option allows LuxR fittings to be wired in parallel to existing or new installations where a wire wound or magnetic transformer is being used.
